FIELD TRIPS

Nothing beats an exciting hands-on experience to deepen a student's learning. The magic of a field trip can ignite the imagination and instill the love of learning for students of all ages. In March, over a thousand students and their families attended the field trip to Legoland and Sealife Aquarium where fun and imagination collided to create an educational learning experience of science, technology, and engineering. Let's not forget FUN! This was just one of over 80 educational field trip programs that are offered through Springs Charter Schools throughout the school year.

Centurion Track and Field team with coach Jorge Peña to the left and coach Davis to the right, getting ready to represent River Springs Temecula.

Temecula Girls Track and Field team arriving to their 4th meet looking to qualified to league finals. Always having a good time and taking care of each other.

Marika Trejo qualifying and advancing to league finals on the 1600m.

Makenzie Collins leading league in the 3200m event. Looking to keep it up and capture our first league championship on May 1, 2017, at Rancho Verde High School.

Pie Fundraiser- The students got a chance to raise money and pie the staff! They put money into the container of the teacher they wanted to see pied the most. If the students had raised \$500, then the whole staff would have been pied. They did not reach that goal but did raise enough money to pied Mr. Wickwire, Mrs. Martinez, and Mrs. Gooding.

STUDENT CENTER

As part of her career day passion project, Rebecca made a cake using fondant frosting to decorate it. She would like to be a baker when she grows up and has been interviewing various bakers to learn about the trade.

Our class read a book together about a classroom pet that was a hamster. The class then wanted a pet of our own. The students started collecting money and one even researched how much it would cost to get a hamster. Once money started coming, we sent out an email to parents asking for donations. When we didn't receive enough money, we applied for a classroom pet grant through Petsmart. The principal, Mrs. Zinda, felt guinea pigs were probably a little more sturdy than a hamster. The class gave suggestions for names and 4 names were voted on. Gibbles was the winning name, however, we call her Princess Gibbles. Gibbles joined the classroom on Tuesday, March 21st.

Our class currently has 28 pet Monkey Tree frogs! After doing a project on the life cycle of a frog, a student in our class donated her remaining tadpoles and some frogs to our classroom. The students were then able to watch the entire growing process from tadpole to froglet all the way to the frogs we have today.

As a fun writing assignment the students were asked to choose a name for one of the frogs and explain why they chose it. We are enjoying watching our frogs eat and grow!

Hemet RSCS Eagles track team “is a family with great school spirit” and “I’m very proud of them”, Coach Garcia replied when asked how his athletes were doing with their first year of competition. The students continue to improve with higher marks after each meet. Serving their own personal best and exceeding their competition expectations, Coach Garcia expects at least 8 of his 22 athletes to qualify for finals. Good Luck Eagles! RISE UP!

In Drawing & Painting class, Jennifer Graham's students have been using their knowledge of basic shapes to guide their drawing of animals, birds, and reptiles. For the last few lessons, they have been experimenting with vine charcoal to draw animals realistically. Vine charcoal is great for practicing line, form, texture, shading, light, and dark to create a realistic drawing. Talk about engaged and joyful learners and artists! The animals came from the Nature on Loan program at the San Diego Natural History Museum. Teachers may check out up to 7 pieces for two week periods. It's like a nature library!

RANCHO CUCAMONGA

PERSONALIZED LEARNING CENTER

In school studies, we are working on a "Forces of Nature" Tk-8 Unit study theme. For our Project Based Learning we are doing a school wide activity of building a butterfly garden. Students have worked on the butterfly life cycle. Each had their own butterfly which they had from a caterpillar, and then this past Friday we released our butterflies.

VENTURE

ONLINE

SPRINGS
CHARTER SCHOOLS

Hi! My name is **Pia Spors**. I am currently a 9th grade student at Venture Online.

When I am not busy with schoolwork, I enjoy kickboxing, reading, and playing the violin. I also have two younger siblings - a brother and a sister - with whom I spend the rest of my free time. My favorite school subject is Language Arts, but Science is a close second. A fun fact about me is that I was born and raised partly in Germany.

Venture Online is a very student-oriented school, and the teachers do their best to cater to every student's needs.

This is one of the main reasons why I prefer this school over any other. Besides the teachers, Venture Online also offers its student the opportunity to take classes on campus. I think that this is a really great way to work on any weak spots that I may come across during the school year.

Sometimes, it is helpful to have a teacher explain a concept to you in person rather than try to teach it to yourself. Venture also provides its students with the possibility of internships. This is a tremendous chance to not only find out where your interests lie, but to act on them as well. I am thankful for all the amazing opportunities Venture Online has and continues to offer me.

To learn more about Venture Online please reach out to the Program Facilitator, Michelle Lomas at michelle.lomas@springscs.org or Program Director, Andrea Leib at andrea.leib@springscs.org

The end
